LEATHER CRAFTS

to create, manufacture, exhibit, share and teach

We work in an open space so as to allow one to see how a bag is built. Seeing and discussing together the elements that compose a bag gives our customers a unique opportunity to understand the different steps involved in their final product.

TRAINING

to have fun and learn

We organise workshops for manufacturing simple leather goods. Classes are composed of a minimum of 3 students to a maximum of 6. A basic course lasts 4 hours. Different courses are under development. Contact us for more information.
